Vladislava Berestova

Senior Product Designer | Design Systems & AI Workflows

Armenia | +374 93 077 456 | vberestova95@gmail.com | vberestova.com | LinkedIn

PROFESSIONAL SUMMARY

Senior Product Designer with 6+ years of experience designing B2C and B2B products across gaming, fintech, proptech, HR Tech, logistics, and SaaS. Leads end-to-end product initiatives from discovery and research to scalable UX, design systems, validation, and production delivery. Experienced in translating complex product challenges into clear user experiences, improving cross-functional design processes, and helping teams ship higher-quality products. Currently focused on design systems, AI-assisted workflows, and internal tools.

CORE EXPERTISE

Product Discovery | UX Research | Usability Testing | Information Architecture | User Flows | Interaction Design | Prototyping | Design Systems | Product Analytics | A/B Testing | Design Operations | Engineering Handoff | Design QA | Cross-functional Collaboration | AI-assisted Workflows

PROFESSIONAL EXPERIENCE

BetBoom | Product Designer, Design Systems

Apr 2025 - Sep 2026

Armenia | Hybrid

- Led the end-to-end design of BB PASS, a core gamification product, partnering with Product Managers to shape the vision and deliver the experience from concept to production.
- Redesigned gamification mechanics for scalability and future feature expansion while coordinating work across multiple designers.
- Designed and validated a task card concept that confirmed a key product hypothesis and improved user engagement; launched a referral program that attracted about 3,000 users.
- Introduced regular usability testing, improved design reviews, and standardized engineering handoff, resulting in higher-quality releases and fewer production revisions.
- Audited the UI Kit and introduced a component handoff approach that reduced design-to-development handoff time by 2x.
- Built an internal Figma plugin with Claude Code to automate design token handoff, component version control, and design system QA; drove AI adoption through workflows and internal talks.

Ronas IT, Doubletapp, Looch, Revvy | Senior Product Designer

May 2022 - Mar 2025

Armenia | Remote | Contract

Worked with Yandex Turkey, Avito, Kokoc Group, and other technology clients across consumer and B2B products.

- Designed the Turkish Yandex News MVP using a mobile-first approach, created concepts for hypothesis validation, and collaborated closely with engineers and stakeholders.
- Designed Proactive, a field service ecosystem with customer and technician apps plus an operator dashboard, including its visual language, design system, and service blueprints.
- Redesigned Revvy's Templates experience using analytics, heatmaps, usability testing, and first-click testing; also designed AI chat flows and prompt templates.
- Redesigned registration and KYC flows for an online brokerage product, doubling registration conversion.
- Led UX research for Doubletapp's internal CRM and created a prioritized backlog that guided approximately six months of product improvements.
- Delivered a Figma plugins workshop for 12 designers and created Ronas IT portfolio concepts, with 70% featured as Top of the Day on Dribbble.

PROFESSIONAL EXPERIENCE, CONTINUED

Ujin Technologies | Senior Product Designer

Jan 2021 - Mar 2022

On-site

- Initiated and led the migration of Ujin Service to a new design system, reducing development effort for new features by 15%.
- Introduced shared Figma libraries and plugins for white-label applications, improving time-to-market for product customization and streamlining design-to-development handoff.
- Designed Ujin Key, a smart access control interface for remotely managing access to residential buildings and private properties.
- Mentored and onboarded two design interns.

HelpHub | Middle Product Designer / Junior Product Manager

Mar 2020 - Jan 2021

Remote | Part-time

- Designed a volunteer mobile application and coordinator dashboard from discovery through release; coordinated design work and launched the marketing website on Tilda.
- Conducted user interviews and MVP usability testing, translating findings into UX improvements, new features, and backlog priorities with Product Managers.
- Helped pilot the platform with 30+ volunteer organizations and support the completion of 200+ requests.
- Used validation findings to inform the decision to discontinue the product after its commercial hypothesis proved unviable.

Self-employed | Freelance Graphic & UX/UI Designer

Sep 2019 - Mar 2020

Remote

- Redesigned and rebuilt Avtodop's website, increasing consultation requests from 1 to 3-4 per day and reducing customer drop-off by 50%.
- Redesigned a building materials e-commerce website, resulting in 2x more inbound customer inquiries.
- Created production-ready catalogs, reusable templates, branding, and marketing assets for construction and service companies.

EDUCATION

Perm State National Research University

Bachelor's Degree in Geography | 2014-2019

PROFESSIONAL DEVELOPMENT

Yandex Practicum - Product Approach

Sep 2023 - Feb 2024

TOOLS

Figma, FigJam, Jira, Miro, Notion, Adobe Creative Suite, Principle, Claude Code, Codex, ChatGPT, VS Code, GitHub, Recraft
